

N2 Gas Generator

MS9000SAN Rework System + MS15N N2 Gas Generator

The Photograph is attaching of MS15N N2 Gas Generator for MS9000SAN Rework System
MS15N is N2 gas generator only for rework system. It can be used with almost all the hot air heating type rework system. And it can connect also for current use rework system.
It is very little cost and, moreover, easily get of the heating environment by N2 gas

Fuatur

- **N2 Gas is simply generated from the Air.**
- **Power supply is unnecessary.**
- **Silent and there is also no generating of dust.**
- **Compact size. (700L x 120D x 110Hmm)**
- **Low Cost**
- **Connection also with the existing rework M/C is possible**
- **Connection is only inserted in air piping.**

Abstract

MS15N is applies the oxygen separation function of Polyimide resin and increase the density of nitroge. Therefore, also in operation, it is silent and a power supply is unnecessary.

Specification:

Item	Description
Air Supply	0.5~0.8Mpa 10~40L/min
Air Connection	IN / OUT 6Φmm Air Tube
N2 Gas	95% /0.7Mpa 20L/min
Demention	700W x 120D x 110Hmm 7.0Kg appox.
